AUTOMATION

PROFILE SUMMARY

Experienced Sr. Unity 3D Developer & Python Developer with 6+ years in designing and publishing 2D mobile games, multiplayer systems, and WebGL metaverse experiences. Published 12+ games on Google Play with 500K+ combined downloads. 1 year of hands-on experience in Python development with focus on AI/ML integration, automation systems, and backend development using Django and FastAPI. Expertise in gameplay systems, UI/UX, Photon Fusion multiplayer, mobile optimization (60 FPS), and building scalable automation pipelines.

CORE COMPETENCIES

Game Development: 2D Games, Hyper-Casual, Physics-Based Mechanics, Level Design, Gameplay Systems

UI/UX Design: Game UI, Menus, HUD, Leaderboards, In-game Notifications

Multiplayer Networking: Photon Fusion, Real-Time Sync, WebSocket, Socket.io

Python & AI/ML: Django, FastAPI, OpenAI GPT-4, LangChain, Prompt Engineering, LLM Integration, Celery, Redis

Automation: Selenium, Playwright, Appium, Parallel Processing, Task Queues, Bot Development

Databases: PostgreSQL, MySQL, SQLite, Redis, Django ORM

SKILLS

Unity3D

Unity 6

Unity 2D

CERTIFICATIONS

- ✓ Unity Multiplayer Photon Fusion 2
- ✓ AR/VR Development Mastery
- ✓ Photon Networking Multiplayer Systems
- ✓ Advanced Unity Performance Optimization

WORK EXPERIENCE

Sr. Unity 3D Developer & Python Developer

No Borders Technologies Pvt Ltd Apr 2020 - Nov 2025

Unity 3D Development (5 Years):

- Published 12+ 2D mobile games with 500K+ downloads on Google Play Store.
- Developed gameplay systems, including level progression and physics-based mechanics.
- Designed responsive UI: menus, HUD, leaderboards, notifications.
- Optimized Android/iOS games for stable 60 FPS across devices.
- Architected multiplayer networking (Photon Fusion) supporting 50-100+ concurrent players.
- Developed multiplayer games like LudoMania and XANA Metaverse with 100+ concurrent players.
- Enhanced performance by 40% through memory profiling, garbage collection optimization, and asset management.
- Developed XANA WebGL Metaverse, supporting 100+ concurrent players across all platforms.

Python Development & AI/Automation (1 Year):

- Contributed to enterprise AI orchestration platform with specialized AI modules using Django, OpenAI GPT-4, and LangChain.
- Assisted in building automation systems for social media account management using Python, Selenium, and Playwright.
- Implemented AI-powered automation workflows integrating LLM APIs for intelligent content generation and engagement.
- Developed real-time WebSocket communication features using Django Channels for streaming AI responses.
- Built automated bot systems for Telegram, Discord, and Slack platforms using Python and Django.

- Worked on task queue systems using Celery and Redis for asynchronous processing and job scheduling.
- Contributed to monitoring solutions with production analytics queries and real-time log shipping.

Sr. Unity 3D Developer

Advantal Technologies, Indore Mar 2017 - Apr 2020

PROJECTS

XANA Metaverse — 24 Months

Multi-region cities, avatars, networking, AI NPCs, Web3 infrastructure. All platforms: Android, iOS, Desktop, WebGL, VR (Oculus Quest 3s Meta).

AR Zombie Game — 60 Days

Location-based AR game (50K downloads, MapBox). Custom Map for Android and iOS.

UNB Virtual Museum — 6 Months

3D artifacts, dynamic lighting, VR locomotion. Multiple platforms: HTC Vive, Oculus Rift, Desktop.

Multiplayer VR Office — 5 Months

Meetings, presentations, avatars, real-time voice. Multiple platforms: Android, iOS, VR HTC Vive, Oculus Go.

LudoMania — 45 Days

Popular multiplayer board game with engaging gameplay and social features for mobile platforms.

NFTDUEL — 24 Weeks

NFT-based trading card game with blockchain integration and competitive multiplayer gameplay.

Flying Jet Theme Game — 60 Days

Educational question-based game with flying jet theme for interactive learning experiences.

Bubble Theme Game — 40 Days

Educational bubble-themed quiz game combining entertainment with learning objectives.

Python & AI/Automation Projects:

AI Automation Platform (Python) — Ongoing

Contributed to multi-module AI orchestration system with specialized AI assistants using Django, OpenAI GPT-4, LangChain. Real-time WebSocket communication and intelligent automation.

Social Media Automation Bots (Python) — Ongoing

Built automated engagement systems for Telegram, Discord, and Slack using Python, Django, Selenium, and Playwright. Implemented intelligent interaction patterns and scheduled task execution.

Notification & Alert Bot (Python) — Ongoing

Automated task workload alerts for developers on Slack. Implemented deadline reminders and team coordination workflows.

EDUCATION

MCA | Computers — 2015

Shri Vaishnav Institute of Management & Science, Indore | Grade - 7.4/10

B.Sc | Computers — 2011

Gujarati Science College | Marks - 64%

12th — 2008

Madhya Pradesh, Hindi | Marks - 58%

10th — 2006

Madhya Pradesh, Hindi | Marks - 69%

EXTRA-CURRICULAR ACTIVITIES & ACHIEVEMENTS

- ★ Mobile 2D: 12+ Published Games on Google Play | 500K+ Downloads | 40% Performance Improvement
- ★ Client Satisfaction: 95% Client Satisfaction | 20+ Projects Shipped Across Platforms
- ★ Multiplayer CCU: 100+ Concurrent Players | Sub-100ms Network Latency | Stable 60 FPS Performance
- ★ Japan HQ: Recognized by Japan HQ for Excellence

ADDITIONAL INFORMATION

Hobbies: AR/VR Innovation, Game Prototyping, Cricket & Team Sports, Exploring Immersive Technologies, Python Automation, Coding

Languages: Hindi, Gujarati, English

I Hereby Declare That All The Information Provided Above Is True To The Best Of My Knowledge.
